Why Choose A Lotion Bar?

Because of their high fat content, lotion bars create a protective barrier between our skin and the outside world. They lock in moisture for long-term hydration. Liquid lotion relies on a high percentage of water, which requires stabilizers and preservatives (that's right... you pay for all of that! Plus, drinking water is a much more efficient way to stay hydrated). Because lotion bars contain zero water, they don't need preservatives and bacteria inhibiting additives. Listening to our skin and providing it with nothing but the nourishment it is asking for, gives it the support it needs to keep us safe.

Storage of Lotion Bars should be in a cool, dry place out of direct sunlight.

Do not allow Lotion Bars to come into contact with water as this may allow bacteria to be introduced and decrease the shelf life of your bar. Make sur to apply to dry skin only!

A little goes a long way! Too much all at once may cause skin to feel oily. You'll be surprised how long Lotion Bars will last if you take care of them and use them properly.

“Your Body Is Your Temple.
Keep It Pure And Clean For The Soul To Reside In”
